REASONS FOR ALLOWANCE

Examiner acknowledges a submission of the amendment and arguments filed on February 20, 2004. Claims E1 – 18 are amended. New claims 19 – 23 are added. Amendment and arguments have overcome rejections under 102 (b) and 103(a).

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Attorney, Mr. McQuay on April 19, 2004.

Please amend Claim 13, line 7, as follows:

"wherein there is further provided a pressure-resistant [, preferably] metallic flow channel".

Please amend Claim 18, line 7, as follows:

"wherein there is further provided a pressure-resistant [, preferably] metallic flow channel".

The following is an examiner's statement of reasons for allowance:

Art Unit: 2836

An amended independent Claim 10 discloses a spark gap device, which inter alia, includes following limitation: "an intermediate constant-volume chamber disposed downstream of the arcing chamber and connected thereto by a metallic flow channel, wherein a volume of said intermediate chamber is substantially larger than a volume of the arcing chamber". The closest reference for the claim is Abe et al. disclosing an ignition system for an internal combustion engine having a structure similar to the invented spark gap device. It has electrode, a metallic flow channel and enlarged space downstream of the flow channel, similar to the intermediate chamber of the invention. However, unlike the intermediate chamber of the invention, the enlarged space functions as a combustion chamber, thus making it quite different from the invented structure.

The same limitation in rephrased form is recited again in the independent Claims 18 and 19, thus making them allowable. Additionally, Claim 19 discloses a continuously opened outlet opening, which distinguishes the Claim from Abe et al. reference.

An amended independent claim 13, discloses, inter alia, the walls of the intermediate chamber being covered with a plastic for quenching gas when heated. Such limitation was not found in the collected prior art of the record.

Allowability resides, at least in part, in the above-described limitations, which has not been disclosed in the Prior Art in a search.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2836

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Zeev Kitov whose telephone number is (571) 272-2052. The examiner can normally be reached on 8:00 – 4:30. If attempts to reach examiner by telephone are unsuccessful, the examiner's supervisor, Brian Sircus can be reached on (571) 272 – 2800, Ext. 36. The fax phone number for organization where this application or proceedings is assigned is (703) 872-9306 for all communications.
